Questions and Answers:

Question- Are you allowed to move equipment outside of the firebreak footprint to come at the piles from different angles or does equipment have to stay within the 14' firebreak footprint to break up the piles and spread them?

Answer- Equipment will need to stay within the disturbed footprint. Equipment will be permitted outside of the firebreak footprint for the sole purpose of turning around. The contractor is responsible to not damage existing vegetation or expose mineral earth in areas outside of the firebreak footprint.
