

RFQ - L22AC00472
Jack Wade Creek Topsoil Delivery
Addendum #1

May 22, 2023

SALCHA-DELTA SOIL AND WATER CONSERVATION DISTRICT

P.O. Box 547
DELTA JUNCTION, AK 99737
(907) 895-6279
FAX: (907) 895-6278

Updates to Original Request for Quote:

The material delivery window has been extended to the period starting on June 13 2023 through **June 20 2023**.

The following questions were received:

Question: What are the specifications for the topsoil?

Answer: The topsoil must be free of woody debris larger than 2" in diameter or 2 feet in length, rocks greater than 3", and chemical contamination (hydrocarbons etc.).

Question: Does it need to be certified or just visually accepted?

Answer: No testing or certification is necessary. A Salcha-Delta SWCD employee will need to visually inspect and accept the product.

Question: Is there a way to move the dates back to the 6/19/2023 and spread them out over 3 week period?

Answer: Due to the timing and availability of equipment and operators a three week delivery period starting 6/19/2023 will not meet the project needs. However, the delivery window was extended through 6/20/2023 (see above).
